

## Career Prep

### All Jobs Have Advantages and Disadvantages

Think of three jobs that you might be interested in ten years from now. On your paper, write one job on the top line, one job on the line halfway down the paper, and one job on the top line of the back.

For each job, write the appropriate career cluster, then list three advantages (pros) and three disadvantages (cons).

Discuss what you've written with a partner. Also discuss other advantages and disadvantages.

Based on your partner's input, list at least three more advantages and at least three more disadvantages. **You must have a total of six advantages and six disadvantages of each job.**
